

RAW Tip #1 : Toilets can be clogged by putting a sponge in the bowel and flushing it.

1. get a sponge, tie a string around it to encompass it.
2. soak it in water, let it dry, unwind string, it should be compact
3. FLUSH!

Revolt Against WORK

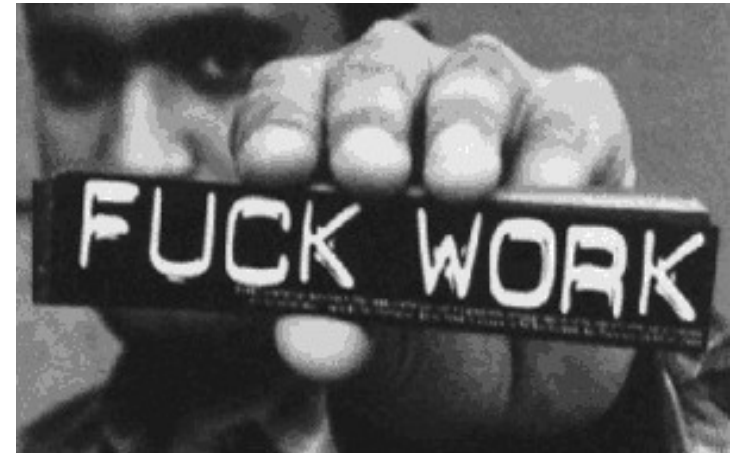

Who We Are

The refusal of work in an atomized society comes in small and often quiet doses. It is a response to the normal exploitation every worker must face day-to-day. In a world where parties, unions and labor groups reinforce a relationship of workers with their bosses, counting our losses at expanding the refusal of work as a win in material gains defines our struggle by the criteria of the present order. When we are productive to this system, we are working against the potential that can free us from perpetuating how we are controlled.

Our needs can be met without compulsive labor defining our ways of life and thus we see potential in the subversion of all forces that enforces this order that deprives us of a full life defined on our own individual terms.

Revolt Against WORK

Bulletin For the Abolition of Work #1

Work Steals your life from you! pollutes your communities and stakes its claim through laws and property to make you play its games. Work assumes we do not even have a right to live, certainly not anything approaching a healthy life except that we can be useful to do a job. What has work done for you? Work has given you the means to pay bills for other workers productions and to pay for your upkeep as it manages your desires with off time and vacation. Work encourages in you that old reframe life sucks...deal with it! This last part is sound advice: WHY NOT DEAL WITH IT? Why not steal your life back? They had the time to steal yours...

RAW To Take On Wilson Road!

Revolt Against Work has begun an adventurous project unheard of in the Central Ohio area. Revolt Against Work has started an analysis of the work situation on this road just west of the Hilltop neighborhood. RAW is taking notice of the urban geography, the traffic, the pedestrian travel, the surveillance and of course the workplaces. RAW hopes their analysis and interpretation of the area will gain notice from individuals who work and individuals who don't work. Perhaps as RAW continues others will agree with their interpretation and take their lives into their own hands and press towards an abolition of work!
